

## Provide out-of-the-box mechanisms for interacting with information and automating business processes

### Join Adobe and Ensemble Systems for a seminar on automating your forms-driven business processes.

This is a great opportunity to learn what Adobe® LiveCycle® solutions can do to streamline and automate forms-driven business processes. Adobe LiveCycle technologies provide out-of-the-box mechanisms for interacting with information and automating business processes. See how this can enable more efficient capture, processing and archiving of your information. Automated forms processing means easier, reliable coordination of information within your enterprise and with your customers.

Discover how Adobe LiveCycle solutions can help you:

- Reduce the high cost of paper-based information gathering
- Streamline data capture and collaboration for internal and external users
- Control document access and usage rights
- Automate and easily maintain your organization workflows
- Digitally sign and certify PDF documents
